ITINERARY

PLEASE NOTE:

All itineraries are for guidance only. Programs may vary depending on ice, weather, and wildlife conditions. Landings are subject to site availabilities, permissions, and environmental concerns per AECO regulations. Official sailing plans and landing slots are scheduled with AECO prior to the start of the season, but the expedition leader determines the final plan. Flexibility is paramount for expedition cruises. The average cruising speed of our vessel is 10.5 knots.

Start your North Spitsbergen cruise with a trek around historic Longyearbyen, then join our expedition to the north of the island to take in the fantastically beautiful landscapes, the thousands of seabirds, and of course the star of the show, the polar bear.

2023 summer solstice: midnight sun, and 24-hour day

The midnight sun is a phenomenon that occurs during the Arctic summer, when the sun is visible for a full 24 hours in fair weather. The 2023 summer solstice in Longyearbyen falls on Tuesday, 21 June, at 16:57 pm. The term solstice (Latin solstitium) means “sun-stopping” and describes the point on the horizon at which the sun appears to rise and set, stopping and reversing directions after this day. On the solstice, the sun does not rise precisely in the east but rather north of east, then later sets to the north of west, making the sun visible for a longer period of time. It will not be until late August that the sun fully goes down again, and then only for a few minutes. Join us in experiencing this fascinating phenomenon during this voyage through the Arctic wilderness of Svalbard.

Day 1: Largest town, biggest island

You touch down in Longyearbyen, the administrative center of Spitsbergen, the largest island of the Svalbard archipelago. Enjoy strolling around this former mining town, whose parish church and Svalbard Museum make for fascinating attractions. Though the countryside appears stark, more than a hundred species of plant have been recorded in it. In the early evening the ship sails out of Isfjorden, where you might spot the first minke whale of your voyage.

Day 2: Route to Raudfjorden

Sailing to Raudfjorden, on the north coast of Spitsbergen, you take in an expansive fjord spilling with glaciers – and maybe even visited by ringed and bearded seals. The cliffs and shoreline of this fjord also support thriving seabird colonies, rich vegetation, and the possibility of polar bears.

Day 3: The massive Monaco Glacier

Depending on the weather, you could sail into Liefdefjorden and cruise within sight of the 5-kilometer-long (3.1 miles) face of the precipitous Monaco Glacier. The waters in front of this glacier are a favorite feeding spot for thousands of kittiwakes, and the base of the ice is a popular polar bear hunting ground. If ice conditions prevent sailing here early in the season, an alternate route along the west coast of Spitsbergen can be implemented.

Day 4: Highlights of Hinlopen

Today you sail into Hinlopen Strait, home to bearded seals, ringed seals, and polar bears. At the entrance there is even the possibility to spot blue whales. After cruising among the ice floes of Lomfjordshalvøya in the Zodiacs, you can view the bird cliffs of Alkefjellet with their thousands of Brünnich's guillemots. On the east side of Hinlopen Strait, you may attempt a landing on Nordaustlandet. Here reindeer, pink-footed geese, and walrus are likely sights. You can take an alternate route if ice prevents entry into Hinlopen.

Day 5: Stop at the Seven Islands

The northernmost point of your voyage may be north of Nordaustlandet, in the Seven Islands. Here you reach 80° north, just 870 km (540 miles) from the geographic North Pole. Polar bears inhabit this region, so the ship may park for several hours among the pack ice before wheeling around west again.

Day 6: Sailing the continental shelf

While retracing your route west, keep watch for polar bears and elusive Greenland (bowhead) whales. About 40 nautical miles west of Spitsbergen, you sail the edge of the continental shelf. Here fin whales forage during the summer in the upwelling zones (where cold, nutrient-rich water wells up from below the sea's surface) that run along the Spitsbergen banks. At the mouth of Kongsfjorden, you have a good chance of sighting minke whales.

Day 7: Reindeer, foxes, and so many seabirds

Walrus sometimes haul out in Forlandsundet, your next stop. Alternatively, you might sail into St. Johns Fjord or south to the mouth of Isfjorden, landing at Alkhorneret. Seabirds nest on these cliffs, Arctic foxes search below for fallen eggs and chicks, and reindeer graze the sparse vegetation. You arrive in Longyearbyen later at night.

Day 8: There and back again

Every adventure, no matter how grand, must eventually come to an end. You disembark in Longyearbyen, taking home memories that will accompany you wherever your next adventure lies.
