

# ICELAND CIRCUMNAVIGATION

9 days | From only USD **3.290** | Departure: 04 June 2021

**ALBATROS**  
EXPEDITIONS

Experience Iceland in high season, where nature displays its best splendor with bright nights and a vibrant birdlife.

You will not want to go to sleep during this trip, as landscapes change constantly, and you want to keep a lookout for the whale sightings. Onboard Ocean Atlantic you will reach areas of Iceland not easily accessible otherwise. In selected locations we will use our Zodiac fleets to further explore the area and its surroundings. From lowlands to glacier ice, we'll see the entire coast of Iceland with unforgettable experiences both on the mainland and on the many islands where seals and puffin seabirds gather.

Along the way, we will visit national parks and cozy little towns, stand on the Polar Circle, enter the black lava sand and learn about the Icelandic sagas, an intrinsic part of the Icelanders' history.
